**Subject: EXOS Scouts Feedback**

Gillis you had yourself an impressive day at the facility and in the field. You exceeded already high expectations coming into the event. Nice work! Below is a collection of the scouts notes on your performance:

### **PROS**

- Above average line drive stroke w/ above average swing balance
- Checks 5-tool boxes on speed, throwing and hitting
- Bat speed jumps out w/ good knowledge of capabilities and strike zone (knows pitches he can handle and barrel up)
- Consistent stance and approach at the plate
- Athlete w/ body that is going to continue to get better
- Passes the eye test
- Loose hands to the swing creating nice whip, compliments his average raw power
- Hands work independently in swing and does not swing with shoulders (plus)
- Hits ball hard and often
- Lift to his swing (doubles, singles hitter)
- Line drive hitter, more contact than power (can get there), oppo ability is average at the moment
- Doesn't lunge at balls at the plate
- Fairly calm approach at the plate, no excessive movements, foot is down ready to impact
- OF wise gets into position consistently w/ good angles and path to the ball (see below)
- Good arm slot and release; (best arm at event), can only get better
- Creates good leverage and planes through his throws
- Clean and easy arm whip creating big velo
- Muscle memory guy
- Velocity is first thing that jumps out; athleticism in delivery
- Majority of times a loose thrower with little effort (injury prevention) and maintains high velo

### **AREAS OF IMPROVEMENT**

- Must get hand and elbow in and closer to mit when receiving ball to capitalize on his plus arm more (gives seconds away at times to potential base runner)
- Max effort throwing mechanics at times, not often, but at times (impacts arm velo and accuracy)
- At times, not often, during fatigue, jabs ball to target, stabbing arm back not creating a clean throwing circle

**Talent Level - Mid Major D1 OF & Pitcher (potential for Power 5 D1 Conferences if stick can improve) (potential high D1 if he can spin it more)**

**MLB Prospect - Yes \*must improve spin on balls and hitting for power (gap to gap)**
